### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The abstract has been amended to --The present invention relates to a method for communication network parameter setting comprising the steps of a) acquiring and storing information related to a1) service requests issued by terminals attached to the network, a2) positions of the terminals, and a3) establishment of the requested service for the terminals, b) matching, based on the position information, the information to a grid of unit areas, the grid of unit areas representing a geographical region in which the network is operated, c) processing the information per unit area, d) outputting the processed information and e) modifying communication network operating parameters based on the outputted processed information.--.

### ***Allowable Subject Matter***

Claims 8-14 are allowed.

The following is an examiner's statement of reasons for allowance: Independent claim 8 is allowable because while the closest prior art US patent 6,463,287 teaches a system and method for monitoring and analyzing characteristics of a wireless telecommunications network based on the geographical position of terminals attached

Art Unit: 2619

to the network, US patent 6,463,287 and the prior art of record fails to teach or fairly suggest a method for communication network performance analysis that includes matching, based on position information of requesting terminals, information including a success indication indicating that a service was successfully established or not and a service attribute to a grid of unit areas representing a geographical region in which the network is operated, and processing the information per unit area wherein the processing includes logically combining service request information and success information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure are:

- US 5,694,451
- US 6,266,514
- US 2002/0103010
